Crowe Valley Conservation Authority (CVCA) - Flood Watch

CVCA has issued a [Flood Watch](#) for the entire Crowe Valley watershed. Belmont Lake was measured at 187.30 (+21 cm above summer level) on Friday, up 64 cm (25") from the winter freeze level. High temperatures and rain in the next few days will lead to additional water in the system.

CVCA is reporting that the rivers in the watershed are running open, with no reports of ice impeding water flow.

Springtime conditions on our waterways can easily create dangerous situations. Please keep aware of the additional hazards in the watershed due to these high water levels flow rates.
